

Science in the Streets

Sacramento Community Service and Science Walk

Join visiting environmental scientists and the Sacramento community to learn about how your everyday decisions impact the health of our environment. We'll explore downtown Sacramento and learn about the connection between our streets and our local waterways, and clean up the downtown streets as we go. We'll end our trash cleanup back at the Convention Center, where there will be an opportunity to meet and talk to scientists about the latest research on environmental pollution that will be on display at their annual conference being held in Sacramento this year, as well as learn about career opportunities in environmental science.

Who should attend: Everyone! Families are welcome. Multiple trash pick-up routes will be available depending on participant needs. This is a great opportunity for all ages to learn about the environment and the activities of scientists from around the world.

When: 2:00 p.m.–4:30 p.m., Sunday, November 4

Where: Meeting point is the Sacramento Convention Center, 1400 J Street, West Lobby

About SETAC

The Society of Environmental Toxicology and Chemistry (SETAC) is a not-for-profit, worldwide professional organization with 5,400 members in more than 80 countries. Members are dedicated to the study, analysis and solution of environmental problems, the management and regulation of natural resources, research and development and environmental education.

About Downtown Sacramento Partnership

Downtown Sacramento Partnership is a private, not-for-profit organization dedicated to the improvement of the central business district of Sacramento through public-private collaborations, which benefit the residents, visitors and investors of the city.
